

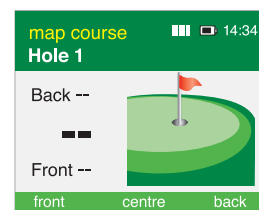

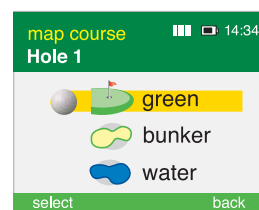

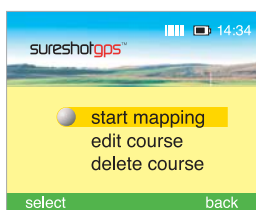

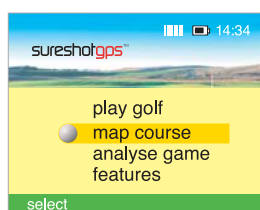

Mapping a course sureshotgps™

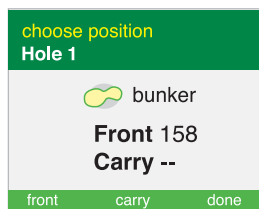

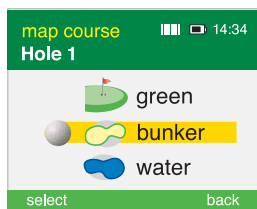

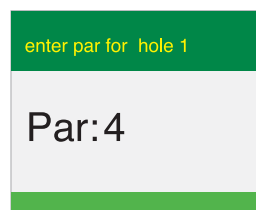

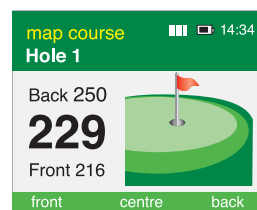

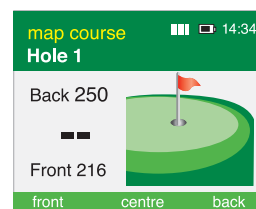

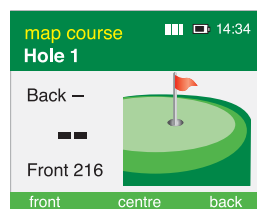

Step ① Select Golf Course

- Turn on the device at the start of the hole to be mapped, wait at least 5-10 minutes before use. Press the menu key Select **map course** using the down arrow Select **start mapping** and enter the course name and save. Press **map** and select **green** or type of **hazard** to be mapped. Highlight the **green icon** and press **select** Start walking down the fairway towards the area to be mapped.

Step ② Map Green

- Walk to the front of the green, wait 20 seconds and press **front** button. It is important to wait for 20 seconds to obtain the best possible reading.
- Walk to the back of the green, wait 20 seconds, and press **back** button
- Walk to the centre of the green, wait 20 seconds, and press **centre** button
- Press the right arrow key and enter the Par of the hole using the up and down arrows. Press **right arrow key** to move to the next hole. Repeat this process for each hole.

Step ③ Map Hazard

- Select the type of hazard to be mapped and its location. Walk to the front of the hazard, wait 20 seconds, and press **front** button. It is important to wait for 20 seconds to obtain the best possible reading. Walk to the position to carry the hazard, wait 20 seconds and press the **carry** key. Press **done**.
- Repeat this process for each hazard.

If you need to go back to the previous screen press the **left arrow**

Step ④ Save Course

- To exit mapping and save press the **menu key** . Press menu key again to return to the main menu.
